Polish Palette Ebba Lindgren

ebba.lovisa.lindgren@gmail.com

Humans have always cared about beauty, and nail art has been practised for thousands of years. Commercial nail polish however contains chemicals and toxins harmful to our health, and often dries up before we can use the whole bottle.

Polish Palette provides a healthier, waste-free alternative. It is a water-based nail polish mixing kit, with a non-toxic formula, no nasty scents and natural mineral pigments. The bottles can be reused since the formula is easy to wash away and there is no need for chemical nail polish remover.

Mix your favorite hues in the bottles to use again next time, or for an extra special color, mix a smaller amount in the bowl. No unnecessary waste, no big collections of dried up polish!
