BAMBOO KITCHEN WARE

Chenruhan0927@outlook.com

Ruhan Chen

A great number of tools in our kitchen are made of plastic or metal, which is not environmental-friendly and power-consuming.

This set of kitchen ware is designed for Asian market, it's made of bamboo since this material is rich in Asia and just need 4 years to grow, so it's more eco-friendly than other materials. Those tools take full advantage of material's properties such as the pliability of bamboo and the shape of pipe. This set includes a grater, a scoop, a cheese slicer, a spoon and a peeler, all of them are very common in Asian kitchen.
