SHROOMING

Kingferalvaro@hotmail.com

Kingfer Alvaro

This is a wooden box which are totally made of recycled pallet wood. These boxes are used to grow your own mushroom of different kinds at home with the help of a start up pack from a professional grower. These wooden boxes can be stack on each other to save space and they will eventually be degraded by the mushroom which can be used as nutrients for the fungi. The soil can later be transferred to a new box with all the degraded wood to keep the fungi colony thrive not only once but as many time as you want.
