### SPROUTER

[kasia.wasniowska@gmail.com](mailto:kasia.wasniowska@gmail.com)

**Kasia Waśniowska**

The goal was to design a product that will bring us closer to natural systems and local resources.

Sprouts are filled with nutrients and easy to grow - all they need is water. You can find them in many stores wrapped in plastic and shipped from abroad. This concept is suited those who are living in cities and struggling with not enough space but would like contribute to good change.

Growing sprouts is not only sustainable but visually rewarding. Sprouters come in different sizes to suit various types of seeds. Every sprouter consists of cork base, metal mesh and glass containers that come in 4 different heights.
