## **THE SUMMER KITCHEN**

**Sverre Wim Berg Størseth**

The summer kitchen is a greenhouse concept where the goal is to spark interest in food production and awareness of food for the whole family.

The summer kitchen is a greenhouse and a small kitchen where you can grow your food and prepare meals directly from your garden. There is also a small space where you can store garden tools, wood or a compost box.

the goal is not to force people to only eat what they can grow during summer, but that their main ingredients can be self grown.
