FILL UP TO THE LINE

s.vanheusden@outlook.com

Seppe van Heusden

Dental care products, skin creams, hair products, liquid soap. Almost all hygienic care products come in high quality plastic packaging, which cost a lot of energy and resources to produce and thereby contribute to global warming and depletion of natural resources.

Fill up to the line simplifies making, storing and using your own hygienic care products. Every container is for a specific cream, since the recipe is literally in the container. Each line indicates up to where you fill every ingredient, saving you the effort of looking up a good recipe and weighing the ingredients. The spoon under the lid makes it easy to mix the ingredients and take your self made cream out of the container.
