SOLID - soap holder

moalundfeldt@gmail.com

Moa Lundfeldt

Liquid soap requires a lot of plastic packaging, a change from liquid to solid soap makes a good impact on our environment. Solid is a modular soap holder system designed for solid soap. It allows you to store several solid soaps in your shower, based on your personal needs. To simplify the use of solid soap, Solid has a design that allows the water to drain off the soap and keep it dry to prevent stickiness.

Solid is fixed to the wall by visible screws to express that the solid soap holder is a permanent and long lasting solution. Solid is casted in aluminum or bronze, both materials that can be recycled.

Solid supports the change from liquid to solid soap and therefore helps us to live a more sustainable lifestyle.
