A sundial to appreciate the cyclic nature of life.

Our Sun has played the most important role in the existence and evolution of life as we see today. History of timekeeping began with devices powered by sunlight, i.e. Sundials.

Sundials have powered the development of civilizations all over the world by introducing a cyclic system of time.

Unlike the mechanical time-keeping devices today, Sundials will never lose time. They will continue to function for thousands of years, powered by an energy that will not deplete for billions of years.

Sunbird is about realizing the importance of time through an animal that embodies the vibrance and life of our planet.

Time is not spent, we are spent.
