SKILJA

Nelita Olsson

nelita.olsson@gmail.com

The household has gone through big changes over time; from living small and sharing beds, to having a home all for yourself. As we move into the future, more changes will come, and flexibility might become a greater need. Skilja was created to facilitate the possibility to add temporary walls in your home. With wooden rods, plastic joints and hangable plywood sheets you can quickly mount and dismount a room divider of chosen shape and size. Skilja is a flexible wall for flexible homes.
