

UNIK

A table lamp that can transfer between working light and ambient light

Unik is a luminaire provided with dual table light sources for the user, ambient light and working light. The compact working table at home has different light source requirements. Working light needs focus on one particular place, while ambient light is diffuse and dim. A smooth switch between the light and look is our goal.

Unik allows the user to slide one part of the light to achieve the change between working light and ambient light. The light consists of two U-shaped pieces, a light source and a bottom which keeps the lamp stand still in different situations.
