Toyota discards numerous forklift wheels on a daily basis, yet they still retain some functions:

**Weight** – With a rubber layer on the outside, they become the perfect fit for repurposing as weight disks. Our upcycled wheel weights not only contribute to reducing waste but also

offer a cost-effective alternative to traditional gym equipment.

**Toughness** – function essential in heavy machinery as well as in delicate craftsmanship. This contrast has led to glass bowls crafted in wheel shape, showcasing the fusion of industrial resilience and artistic finesse.
