

# SYNC - Modular HiFi System

*Aviv Snir*

*in collaboration with*

more about the project

Transform. Amplify. Reimagine sound with Sync, a HiFi system crafted from salvaged forklift parts. Inspired by Kintsugi, the Japanese philosophy, imperfections become beauty.

This modular marvel, born from a collaboration with Toyota Material Handling Sweden and sponsored by **iril**, a Copenhagen-based audio systems design studio, fuses old and new, featuring speakers, a turntable, and a volume console.
